#### TOPICAL PAST PAPER QUESTIONS WORKBOOK

## IGCSE Mathematics (0580) Paper 3 [Core]

Exam Series: May/June 2012 - Oct/Nov 2022

Format Type B: Each question is followed by its answer scheme

#### Introduction

Each Topical Past Paper Questions Workbook contains a comprehensive collection of hundreds of questions and corresponding answer schemes, presented in worksheet format. The questions are carefully arranged according to their respective chapters and topics, which align with the latest IGCSE or AS/A Level subject content. Here are the key features of these workbooks:

- 1. The workbook covers a wide range of topics, which are organized according to the latest syllabus content for Cambridge IGCSE or AS/A Level exams.
- 2. Each topic includes numerous questions, allowing students to practice and reinforce their understanding of key concepts and skills.
- 3. The questions are accompanied by detailed answer schemes, which provide clear explanations and guidance for students to improve their performance.
- 4. The workbook's format is user-friendly, with worksheets that are easy to read and navigate.
- 5. This workbook is an ideal resource for students who want to familiarize themselves with the types of questions that may appear in their exams and to develop their problem-solving and analytical skills.

Overall, Topical Past Paper Questions Workbooks are a valuable tool for students preparing for IGCSE or AS/A Level exams, providing them with the opportunity to practice and refine their knowledge and skills in a structured and comprehensive manner. To provide a clearer description of this book's specifications, here are some key details:

- Title: Cambridge IGCSE Mathematics (0580) Paper 3 Topical Past Paper Questions Workbook
- Subtitle: Exam Practice Worksheets With Answer Scheme
- Examination board: Cambridge Assessment International Education (CAIE)
- Subject code: 0580
- Years covered: May/June 2012 Oct/Nov 2022
- Paper: 3 (Core)
- Number of pages: 1750
- Number of questions: 706

Sachin, his wife and three children go on a coach holiday.

(a) Each adult ticket costs \$375 and each child ticket costs \$194.

Work out the total cost of the tickets.

| \$ | [2]  |
|----|------|
| Ψ  | <br> |

**(b)** A meal costs \$110 plus a service charge of 18%.

Calculate the total cost of the meal.

(c) One day, the temperature at midday is 16 °C. At midnight the temperature has fallen by 23 °C.

Work out the temperature at midnight.

(d) Sachin spends \$768 on holiday.

He spends  $\frac{3}{8}$  of this amount on presents.

Find how much he spends on presents.

| Φ  | I | 1 | - |
|----|---|---|---|
| ď. |   |   |   |

- (e) There are 604 passengers on the holiday.
  - (i) The coach company uses coaches which can carry 46 passengers.

Work out the number of coaches needed.

| <br>[2] |
|---------|

(ii) 268 of the 604 passengers are women.

Find the percentage of the passengers that are women.

|  | <b>%</b> | [1] |
|--|----------|-----|
|--|----------|-----|

(f) A coach travels at an average speed of 54 km/h.

Find how long, in hours and minutes, this coach takes to travel 126km.

..... h ..... min [3]

Answer:

| Question | Answer        | Marks | Partial Marks   |
|----------|---------------|-------|---|
| (a)      | 1332          | 2     | <b>M1</b> for $2 \times 375 + 3 \times 194$ oe                  |
| (b)      | 129.8[0]      | 2     | M1 for $110 \times (1 + \frac{18}{100})$ oe or B1 for $19.8[0]$ |
| (c)      | <del>-7</del> | 1     |   |
| (d)      | 288           | 1     |   |
| (e)(i)   | 14            | 2     | <b>M1</b> for 604 ÷ 46 or 13.1[3]                               |

| Question | Answer         | Marks | Partial Marks   |
|----------|----------------|-------|---|
| (f)      | 2 (h) 20 (min) | _     | M1 for 126 ÷ 54<br>A1 for 2.33 or 140 mins<br>If A0 scored, SC1 for <i>their</i> (decimal time)<br>correctly changed to hours and minutes |

Mr Zhang, his wife and three children go on a holiday from Shanghai to Auckland.

(a) The flight for an adult costs \$630.

The cost for a child is  $\frac{5}{8}$  of the adult cost.

Show that the total cost of the flight for the family is \$2441, correct to the nearest dollar.

[3]

**(b)** The plane leaves Shanghai at 2005 local time on 13th November. The plane stops for 2 hours 30 minutes in Sydney.

The plane lands in Auckland at 1725 local time on 14th November.

The local time in Auckland is 5 hours ahead of the local time in Shanghai.

(i) Work out how long the plane is flying, in hours and minutes.

.....h .....min [3]

(ii) Write your answer to part (b)(i) in hours, correct to 3 decimal places.

.....h [1]

|     | (iii) | The flight distance from Shanghai to Sydney is 7882km. The flight distance from Sydney to Auckland is 2156km. |
|-----|-------|---|
|     |       | Find the total distance the plane flies.  |
|     |       | km [1]  |
|     | (iv)  | Calculate the average speed of the plane when it is flying.   |
|     |       |   |
|     |       |   |
|     |       | km/h [2]  |
| (c) | The   | holiday expenses are in the ratio<br>hotel : car hire : food $= 8 : 5 : 6$ .                                  |
|     | The   | cost of the hotel is \$2400.  |
|     | Sho   | w that the total of the holiday expenses is \$5700.   |

Helga buys some items to do some knitting.

(a) Complete Helga's bill from one shop.

| Item   | Cost (\$) |
|--|-----------|
| 2 pairs of knitting needles at \$4.95 a pair |           |
| 6 buttons at \$0.65 each                     |           |
| 1 knitting pattern at \$3.60                 | 3.60      |
| Total  |           |

[3]

**(b)** Helga also buys 8 balls of wool from another shop.

Each ball costs \$3.12.

Helga pays with a \$50 note.

Work out the amount of change she receives.

\$ ...... [2]

(c) Helga knits some squares.

Each square is either white, pink or blue.

The number of squares are in the ratio white: pink: blue = 5:3:2.

30 squares are blue.

Show that Helga knits 150 squares.

[2]

(d) Helga uses some of the squares to make a rectangular blanket.

The blanket is 6 squares long and 4 squares wide.

(i) Calculate the percentage of the 150 squares she uses to make this blanket.

..... % [2]

(ii) Each square has side length 15 cm.

Work out the perimeter of this blanket.

Give your answer in metres.

(a) A baker puts some cakes in the oven at 5.50 pm. The cakes take 20 minutes to bake.

Complete the clock diagram to show the time when the cakes are baked.

[1]

**(b)** A recipe uses 550 g of flour to make 8 cakes.

Work out the amount of flour needed to make 360 cakes. Give your answer in kilograms.

.....kg [3]

(c)

Bag *B*950 g
60 cents

NOT TO SCALE

Work out which bag of flour is the best value. Show all your working.

| Bag |  | [3] |
|-----|--|-----|
|-----|--|-----|

(d) One cake costs 24 cents to make.

The baker sells each cake for 65 cents.

Calculate the percentage profit the baker makes on each cake.

| <br>% | [2] |
|-------|-----|

(e) The baker asks some customers if they like lemon cake (L) and if they like chocolate cake (C). The Venn diagram shows the results.

(i) Complete the statement.

$$n(\mathscr{E}) = \dots$$
 [1]

(ii) Work out the fraction of the customers who like lemon cake or chocolate cake but not both.

(iii) Use set notation to complete the statement.

$$\{Jai, Nera\} = \dots$$
[1]

(iv) What does the Venn diagram show about Taj?

**(b)** Henry invests \$160 000 at a rate of 2.5% per year compound interest.

Calculate the value of this investment at the end of 3 years.

(c) Rita invests \$12 000 at a rate of r% per year. The value of her investment at the end of one year is \$12408.

Work out the value of r.

$$r = \dots$$
 [2]

(d) Rita and Henry decorate their office.

The cost, c, is \$10 800, correct to the nearest hundred dollars.

Complete this statement about the value of c.

..... 
$$\leq c <$$
 ..... [2]

Answer:

| Question | Answer          | Marks | Partial Marks  |
|----------|-----------------|-------|--|
| (a)      | 900 000         | 2     | <b>M1</b> for $\frac{2400000}{3+5} \times k$   |
| (b)      | 172302.5[0] cao | 2     | <b>M1</b> for $160000 \times (1 + \frac{2.5}{100})^3$ oe                               |
| (c)      | 3.4             | 2     | M1 for $\frac{12408 - 12000}{12000}$ [× 100] oe or $\frac{12408}{12000} - 1$ [×100] oe |

- .....[1]
- **(b)** A, B and C are three **consecutive** whole numbers.
  - A is a prime number.
  - B is a cube number.
  - C is a square number.
  - A + B + C is less than 40.

Find A, B and C.

| A = |         |
|-----|---------|
| B = |         |
| C = | <br>[2] |

- (c) Put one pair of brackets into each of these calculations to make them correct.
  - (i)  $4 \times 3 + 7 \div 2 = 20$

[1]

(ii)  $51 - 12 \div 3 + 6 = 19$ 

[1]

- (d) Write down
  - (i) the reciprocal of 8,

.....[1]

(ii) the value of  $14^0$ .

.....[1]

- (e) Calculate.
  - (i) 5<sup>4</sup>

.....[1]

(ii)  $\sqrt[3]{6859}$ 

.....[1]

(iii)  $16^{-\frac{1}{2}}$ 

.....[1]

### Answer:

| Question | Answer                    | Marks | Partial Marks   |
|----------|---------------------------|-------|---|
| (a)(i)   | 17                        | 1     |   |
| (a)(ii)  | 27                        | 1     |   |
| (a)(iii) | 30                        | 1     |   |
| (b)      | 7, 8, 9                   | 2     | M1 for any 2 conditions in final answer from: A prime or B cube or C square or consecutive A + B + C < 40 |
| (c)(i)   | $4\times(3+7)\div 2=20$   | 1     |   |
| (c)(ii)  | $(51-12) \div 3 + 6 = 19$ | 1     |   |
| (d)(i)   | $\frac{1}{8}$ or 0.125    | 1     |   |
| (d)(ii)  | 1                         | 1     |   |
| (e)(i)   | 625                       | 1     |   |
| (e)(ii)  | 19                        | 1     |   |
| (e)(iii) | $\frac{1}{4}$ or 0.25     | 1     |   |

From this list of numbers, write down

(i) a multiple of 24,

.....[1]

(ii) a square number,

.....[1]

(iii) a cube number,

.....[1]

(iv) a prime number.

.....[1]

**(b)** Write 420 as a product of its prime factors.

.....[2]

(c) Find the lowest common multiple (LCM) of 30 and 84.

| <br>[2] |
|---------|
|         |

(d) By writing each number correct to 1 significant figure, show that an estimate for this calculation is 40.

$$\frac{9.875+18.305}{3.418}+27.837$$

[2]
